

Air Pollution – Brief Analysis for October 2022

Air pollution is a problem faced all across the country. Despite several steps announced by the government and formation of committees and action plans, things on ground leave a lot to be desired. The matter takes urgency in the North during the winter months when the situation becomes critical.

Environics has installed low cost portable air monitors in several locations in the city of Korba which has large number of coal mines, power plants and other industries to capture the extent of air pollution. Devices have also been installed in Delhi and Ranchi. List of devices and locations can be seen in the Annexure. Below is a brief representation of data captured by these devices. The analysis has been done for two reporting periods – 1 October to 31 October 2022 and Jan to October 2022 (till date)

Section 1 – Data Analysis for period Jan to October 2022

Monthly Average AQI - Different Cities										
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct
Korba	268	202	217	206	110	123	80	91	106	173
Delhi	330	224	188	139	114	80	76	86	96	257
Ranchi	-	-	-	-	-	-	158	89	91	174

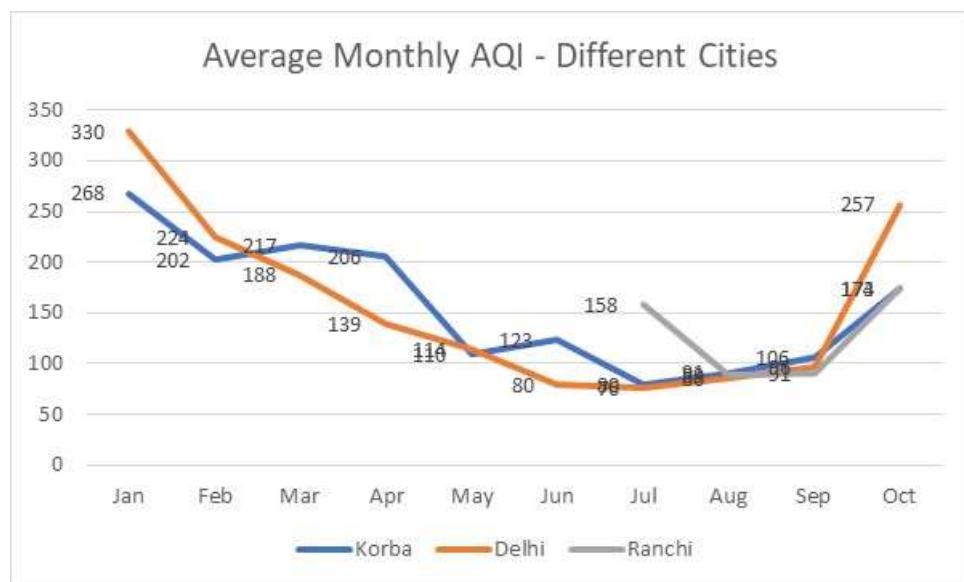

Table and Graph above show the Average Monthly AQI in different locations. The graph and data clearly showcase the winter months when AQI comes under dangerous levels and summer and monsoon months when the air quality is Satisfactory. This data shows when urgent steps for air quality improvement need to be undertaken on a war footing. Although, air quality improvement should be a year long activity and the base load factors like vehicle exhausts, industrial exhausts, construction dust etc which are year wide activities need to be controlled better so that seasonal factors like biomass burning, cold conditions, calm winds etc can have minimal impacts. Currently in the entire country the base load of air pollutants is very high and any short or seasonal factors take the air quality into severe one which can be very hazardous for health. During this period, Delhi recorded the worst AQI in the month of January. Out of 10 months, for 6-month AQI in Delhi was above 100 while Korba

had AQI above 100 for 8 months. The overall data for Korba shows that Korba Air is more polluted than Delhi.

Monthly Average HI - Different Cities										
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct
Korba	19	24	29	36	40	39	37	35	35	30
Delhi	17	20	26	32	35	36	39	37	36	28
Ranchi							31	30	29	24

The above table shows the Monthly Average Heat Index for different cities.

Data on AQI categories – Under the NAAQS, AQI categories have been listed which lists the different levels of Air pollution.

The Table below shows the AQI Categories for All device's location wise since January 2022. The numbers are daily figures for individual devices which have been added up based on cities. It means that AQI in Korba was between 0-50 on 161 daily intervals as recorded by all devices installed in Korba. The data shows that in all locations more than 50% of the days, AQI has been above 100. Delhi and Korba recorded almost 29% of the intervals with AQI above 200. Both these cities have severe air pollution which needs to be controlled drastically and urgently.

Location wise Totals								
	0-50	50-100	100-200	200-300	300-400	>400	Grand Total	Percent AQI >100
Korba	161	479	799	383	151	45	2018	68.29%
Delhi	380	759	889	452	240	117	2837	59.85%
Ranchi	4	27	27	5	1	0	64	51.56%

The Table below show City wise and month wise AQI categories wise information. The numbers are daily figures for individual devices which have been added up based on locations for each month. It means that AQI in Korba was between 50-100 on 12 daily intervals as recorded by all devices installed in Korba. The data shows the severe AQI months for both Korba and Delhi. Atmospheric conditions play a vital role in Air Pollution hence, AQI is Satisfactory in the summer and monsoon month when dispersion of pollutants is high. Weather conditions along with emission sources should be carefully considered and emissions controlled to ensure AQI remains below 100 throughout the year.

		0-50	50-100	100-200	200-300	300-400	>400	Grand Total	Percent AQI >100

Section 2 –Information and Analysis for October 2022

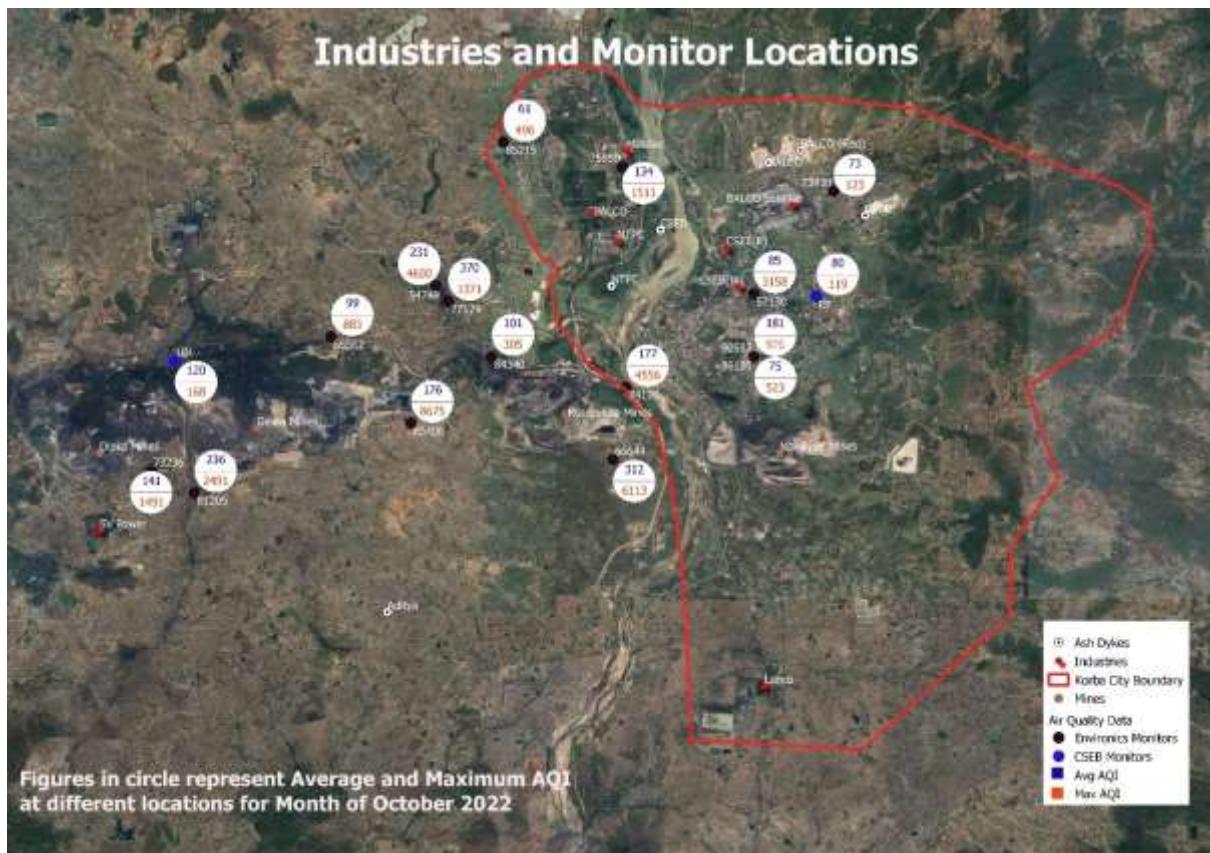

Location wise Avg and Max AQI		
Location	Avg	Max
Korba	173	8675
Delhi	257	1325
Ranchi	149	2669

Table above shows the city wise Avg and Max AQI for October 2022. During this period Avg AQI is highest in Delhi although the Max AQI is recorded highest in Korba and has been recorded above 8000. Although such high numbers have been recorded only for a few intervals but getting such high number for AQI is a matter of grave concern. In Delhi also, the Max AQI recorded has crossed 1000 which is a matter of alarm.

Data for individual devices placed at Korba can be seen in below table. Out of 15 devices which worked in Korba in this period 11 devices recorded maximum AQI greater than 1000 and further 2 were around 900. Average Monthly AQI is above 100 in case of 11 devices. Device placed at Surakachar chowk near the underground Mines recorded the highest Avg AQI at 370 while device at NTPC Housing Colony was the cleanest at 61.

Location wise Avg and Max AQI for devices placed at Korba				
Device Number	Location	Avg	Max

861480034786097	RSS Nagar	75	523	
861480034754749	Gud Deva (Coal Siding)	231	4600	

The map image below shows the locations of the devices installed in Korba along with the locations of major coal mines, Thermal power plants and ash dykes. The Korba municipal boundary is marked in Red color. The numbers in the map show the Avg and Max AQI for each location along with the device number. Two monitors have been installed by CSEB at Ram Pur and Urja Nagar. These devices have worked for only 5 and 3 days respectively in October (since the beginning of year 2022) and now are shown under maintenance. A few days of operation in dirty air may have damaged the equipment's and sensors or the agency doesn't want the data to become public.

Map - Install and industrial locations at Korba. Numbers reflect Avg and Max AQI of the location for October 2022. Map also shows the location of major coal mines, Thermal Power Plants and Ash Dykes. Korba Municipal Boundary is marked in Red color

Daily average AQI for Different Cities for October 2022															
	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Korba	87	62	233	106	99	120	227	100	85	95	134	165	192	189	198
Delhi	88	169	232	38	47	38	43	60	133	190	148	198	234	287	268

Ranchi	-	-	-	-	-	-	143	156	63	-	-	-	-	-

The Tables above show Daily Average AQI between different cities. Cells where AQI>100 have been highlighted. In Delhi, the period of October when AQI is below 100 experienced heavy rainfall which improved the AQI drastically and as soon as rain ended, the AQI deteriorated. Diwali on 24 October saw a further fall in AQI category although the impact of crackers was for a short duration of 10-12 hours.

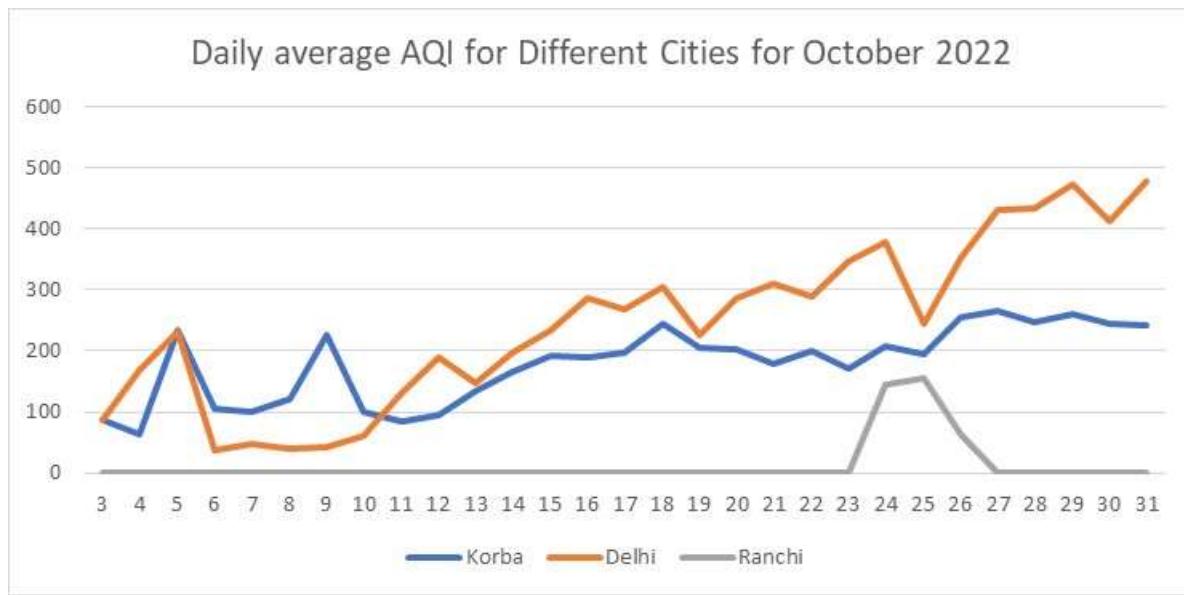

Table below shows the Daily Avg AQI for individual devices placed at Korba.
