

Air Pollution – Brief Analysis for August 2023

Air Pollution is a big issue in India especially in the Northern part. However, even though the issue is highlighted in the media and lot of steps are announced by the government to curtail air pollution, situation on the ground remain unchanged to a large extent. With the onset of monsoon, the problem takes a back seat as the air quality improves due to favourable weather conditions and the governments start claiming that the improvement is due to their efforts. Driving on a two-wheeler or cycling on roads in Delhi is dangerous even in monsoon period with large amount of road and construction dust which can cause severe impacts. This issue needs to be taken seriously and permanent solutions found so that air quality improves all year round.

Below is a brief representation of data captured by portable devices installed in multiple locations in Korba and Delhi. The analysis has been done for two reporting periods – 1 August to 31 August 2023 and Jan 2022 to August 2023.

Section 1 – Data Analysis for period Jan 2022 to August 2023

| | Monthly Average AQI - Different Cities | | | | | | | | | | | | | | | | | | | |
|--------|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|--------|--------|--------|--------|--------|--------|--------|--------|
| | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan-23 | Feb-23 | Mar-23 | Apr-23 | May-23 | Jun-23 | Jul-23 | Aug-23 |
| Korba | 344 | 239 | 304 | 256 | 102 | 118 | 72 | 80 | 93 | 204 | 320 | 318 | 319 | 283 | 245 | 197 | 124 | 94 | 63 | 67 |
| Delhi | 355 | 303 | 218 | 133 | 98 | 75 | 71 | 67 | 85 | 323 | 380 | 372 | 412 | 328 | 198 | 125 | 124 | 71 | 80 | 62 |
| Ranchi | | | | | | 200 | 81 | 77 | 159 | 158 | 198 | | | | | | | | | |

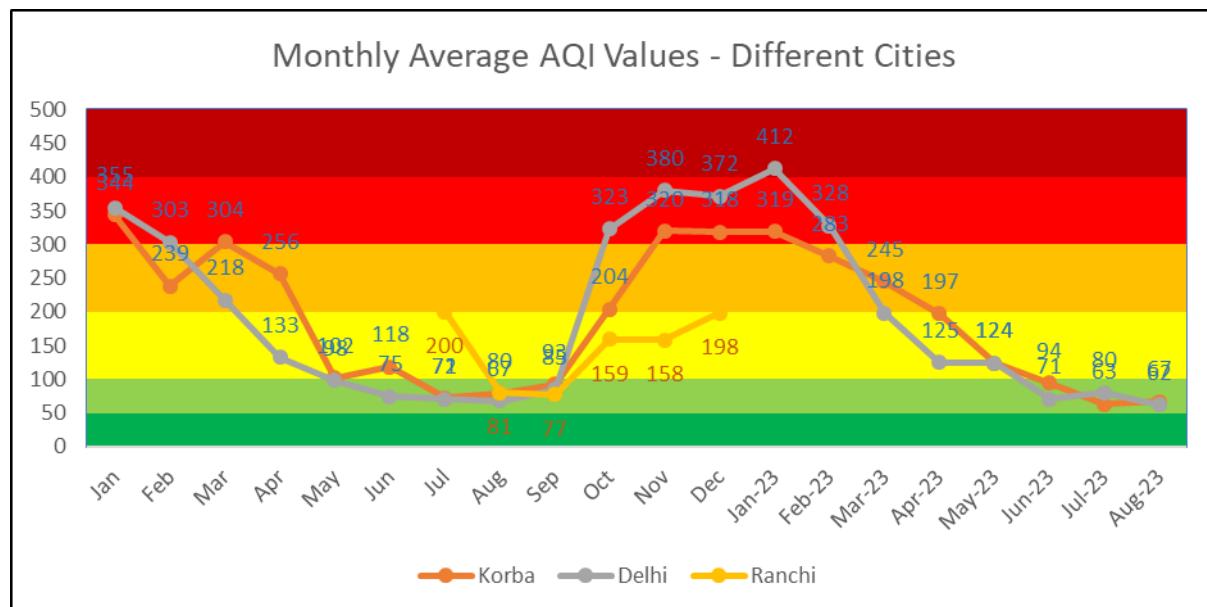

Table and Graph above show the Average Monthly AQI in different Cities. The graph and data clearly showcase the winter months when AQI comes under dangerous levels and summer and monsoon months when the air quality is Satisfactory. It is clear that AQI increases with the onset of winter and has started decreasing as summer progresses. With the onset of monsoon, there should be further improvement. This improvement in Air quality is primarily because of favourable weather conditions and not because of any mitigation aspects taken by the industries or government agencies. It is again approaching the time of the year when AQI starts going up. It will be interesting to see the trend this year considering the various steps adopted by the government.

- During this period, Delhi recorded the worst AQI in the month of January 2023. Out of 20 months, for 13-months AQI in Delhi was above 100 while Korba had AQI above 100 for 15 months.
- August 2023 Air quality has improved over the previous month figures for Delhi while it marginally increased for Korba.
- Air quality is poorer in Korba as compared to Delhi in August 2023
- The overall data for Korba shows that Korba Air is more polluted than Delhi for longer durations in the year.
- In comparison with August 2023 and 2022, AQI has decreased in both Korba and Delhi
- The different colour bands in the graph respond to the AQI categories as stated in the NAAQs (More later in the document)

| Monthly Average HI - Different Cities | | | | | | | | | | | | | | | | | | | | |
|---------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|--------|--------|--------|--------|--------|--------|--------|--------|
| | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan-23 | Feb-23 | Mar-23 | Apr-23 | May-23 | Jun-23 | Jul-23 | Aug-23 |
| Korba | 19 | 24 | 29 | 36 | 40 | 39 | 37 | 35 | 35 | 30 | 23 | 21 | 21 | 24 | 29 | 32 | 35 | 40 | 39 | 35 |
| Delhi | 17 | 20 | 26 | 32 | 35 | 36 | 39 | 37 | 36 | 28 | 24 | 18 | 16 | 21 | 25 | 29 | 32 | 38 | 39 | 38 |
| Ranchi | | | | | | | 31 | 30 | 29 | 24 | 20 | 18 | - | - | | | - | - | - | - |

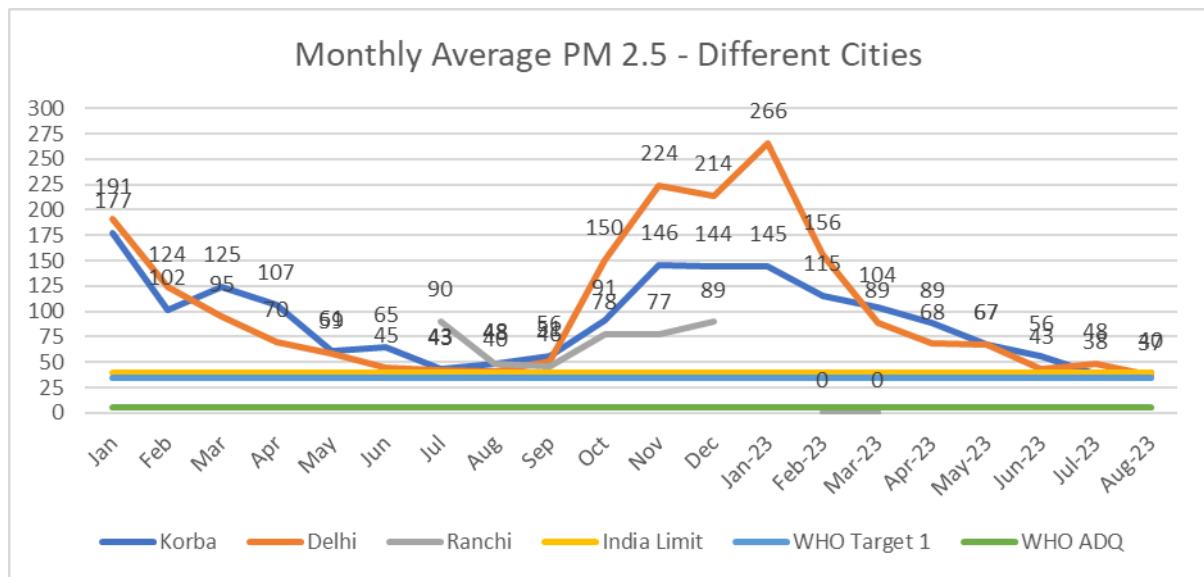

The above table shows the Monthly Average Heat Index for different cities.

Particulate Matter – Particulate matter or PM is the amount of dust particles in the air. These particles can be of different types i.e. organic, metallic etc. There are different sizes for these particles. Particles of size 10 micron are called PM 10. Those between size of 2.5 and 10 micron are called PM 2.5. those between 1 and 2.5 micron are labelled as PM1. The smaller the size of the particles, the easier for it to enter the air stream of the body and cause more impact. NAAQS and WHO (Word Health Organisation) have both set limits for amount of such particles in the air for PM 2.5 and PM 10. Below are the limits set. The Indian standard values are much higher than the WHO ADQ standard and need to be revised downwards. There are no standards yet for PM 1 which is considerably more harmful.

| | PM 2.5 (ug/m3) | PM 10 (ug/m3) |
|-----------------------------|----------------|---------------|
| NAAQS (India Annual target) | 40 | 60 |
| WHO Interim target 1 | 35 | 70 |
| WHO ADQ Target | 5 | 15 |

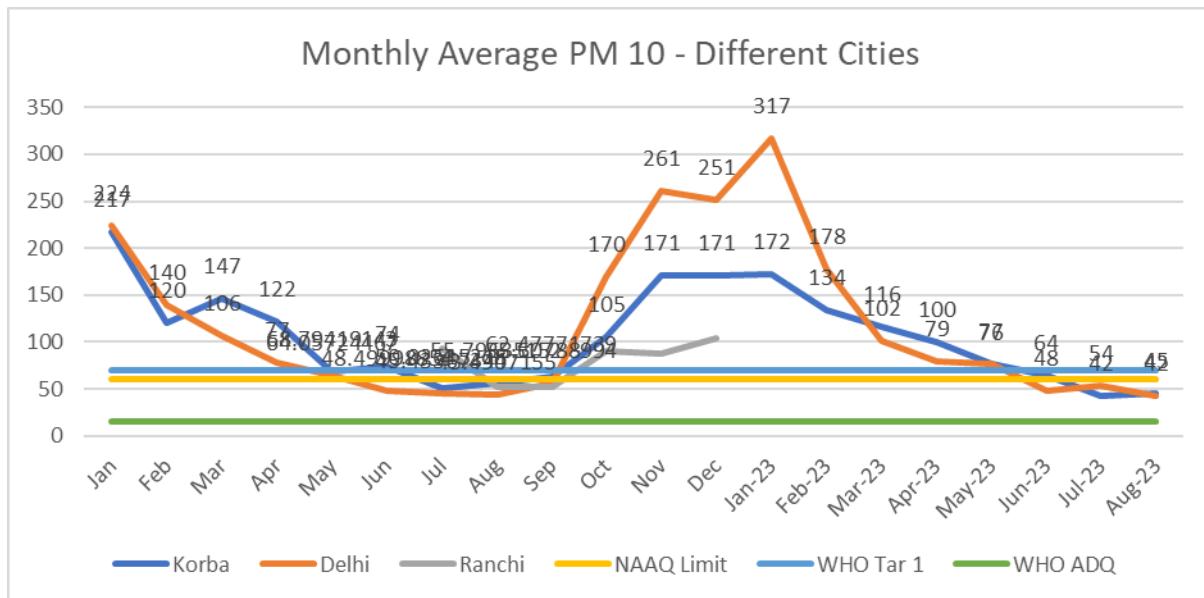

Below is the table and graph showing Monthly Average PM 2.5 values in different cities. In only 1 month in both Korba and Delhi was the Indian standard met. In both Delhi and Korba, the values were more than 4 times the values in some of the months. Only during the monsoon period were the values closer to the standard but were still above. In both Delhi and Korba count of PM 2.5 particles have decreased in comparison with August 2022.

| Monthly Average PM 2.5 - Different Cities | | | | | | | | | | | | | | | | | | | | |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|--------|--------|--------|--------|--------|--------|--------|--------|
| | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan-23 | Feb-23 | Mar-23 | Apr-23 | May-23 | Jun-23 | Jul-23 | Aug-23 |
| Korba | 177 | 102 | 125 | 107 | 61 | 65 | 43 | 48 | 56 | 91 | 146 | 144 | 145 | 115 | 104 | 89 | 67 | 56 | 38 | 40 |
| Delhi | 191 | 124 | 95 | 70 | 59 | 45 | 43 | 40 | 51 | 150 | 224 | 214 | 266 | 156 | 89 | 68 | 67 | 43 | 48 | 37 |
| Ranchi | | | | | | | 90 | 48 | 46 | 78 | 77 | 89 | | - | - | | | | | |

The table and graph below show the Monthly Average PM 10 values in different cities. Except for a few months (Highlighted in Green) which were during the summer and monsoon months, none of the cities met the Indian Standards. In comparison with the WHO ADQ standard, none even came close. Although values have improved in Delhi while they have increased in Korba as compared to August 2022, values are still high. This shows that the base load of pollutants is very high in both these cities and dust which settles during rains is again air borne once the rain stops and sun comes out.

| | | Monthly Average PM 10 - Different Cities | | | | | | | | | | | | | | | | | | | |
|--------|-----|--|-----|-----|------|------|------|------|------|-----|-----|-----|-----|--------|--------|--------|--------|--------|--------|--------|--------|
| | | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan-23 | Feb-23 | Mar-23 | Apr-23 | May-23 | Jun-23 | Jul-23 | Aug-23 |
| Korba | 217 | 120 | 147 | 122 | 68.8 | 74 | 50 | 55.8 | 62.5 | 105 | 171 | 171 | 172 | 134 | 116 | 100 | 76 | 64 | 42 | 45 | |
| Delhi | 224 | 140 | 106 | 77 | 64.1 | 48.5 | 45.4 | 43.5 | 55.6 | 170 | 261 | 251 | 317 | 178 | 102 | 79 | 77 | 48 | 54 | 42 | |
| Ranchi | | | | | | | 92 | 52 | 52.4 | 91 | 87 | 104 | | | | | | | | | |

Data on AQI categories – Under the NAAQS, AQI categories have been listed which lists the different levels of Air pollution. AQI Classification as per NAAQS -

| | | | | | |
|------|--------|---------|---------|---------|------|
| 0-50 | 51-100 | 101-200 | 201-300 | 301-400 | >401 |
|------|--------|---------|---------|---------|------|

The Table below shows the AQI Categories for All device's location wise since January 2022. The numbers are daily figures for individual devices which have been added up based on cities. It means that AQI in Korba was between 0-50 on 408 daily intervals as recorded by all devices installed in Korba. The data shows that in all locations more than 60% of the days, AQI has been above 100. Delhi and Korba recorded more than 32% of the intervals with AQI above 200.

| Location wise Totals (Since January 2022) | | | | | | | | | |
|---|------|--------|---------|---------|---------|------|-------------|--------------|--------|
| | 0-50 | 50-100 | 100-200 | 200-300 | 300-400 | >400 | Grand Total | Percent >100 | >200 |
| Korba | 408 | 1208 | 1897 | 1031 | 635 | 195 | 5374 | 69.93% | 34.63% |
| Delhi | 532 | 1117 | 1192 | 663 | 436 | 256 | 4196 | 60.70% | 32.29% |
| Ranchi | 4 | 30 | 63 | 11 | 2 | 0 | 110 | 69.09% | 11.82% |

The Table below show City wise and month wise AQI categories wise information. The numbers are daily figures for individual devices which have been added up based on locations for each month. It means that AQI in Korba was between 50-100 on 12 daily intervals in January 2022 as recorded by all devices installed in Korba. The data shows the severe AQI months for both Korba and Delhi. Atmospheric conditions play a vital role in Air Pollution hence, AQI is Satisfactory in the summer and monsoon month when dispersion of pollutants is high. Weather conditions along with emission sources should be carefully considered and emissions controlled to ensure AQI remains below 100 throughout the year.

In Delhi, during August 2023, 11% of recorded AQI intervals were above 100 while the figure is 14% for Korba. The corresponding figure in August '22 for Delhi was 18% and 36% for Korba showing an improvement in both cities over previous year.

The Table below show Device wise AQI categories wise information. The numbers are daily figures for individual devices which have been added up till date. It means that AQI measured by device number ending with 66644 was between 50-100 on 41 daily intervals. Except for one device all devices are measuring AQI above 100 for majority of the intervals in Korba.

| Device Wise Totals (Selected Devices) – Since January 2022 | | | | | | | | | |

| 861480034785552 | 92 | 148 | 134 | 92 | 77 | 31 | 574 | 58.19% | 34.84% |

Section 2 –Information and Analysis for August 2023

| Location wise Information | | | | |
|---------------------------|----------------|---------------|-------------|-------------|
| Location | Average PM 2.5 | Average PM 10 | Average AQI | Maximum AQI |
| Korba | 40 | 45 | 67 | 1979 |
| Delhi | 37 | 42 | 62 | 1218 |

Table above shows the city wise Average PM 2.5, PM 10, AQI and Maximum AQI for August 2023. During this period Maximum AQI is recorded highest in Korba which is recorded just below 2000. Although such high numbers have been recorded only for a few intervals but getting such high number for AQI is a matter of grave concern. In Delhi also, the Maximum AQI recorded has exceeded 1000 which is a matter of concern and immediate action. Average AQI is higher in Korba.

Comparison of data between August 2022 and August 2023 can be seen in table below. The air quality has improved over the previous year in both Korba and Delhi. This clearly shows the impact of monsoon and winds on the Air pollution in Delhi. As soon as weather elements become adverse, pollution starts rising.

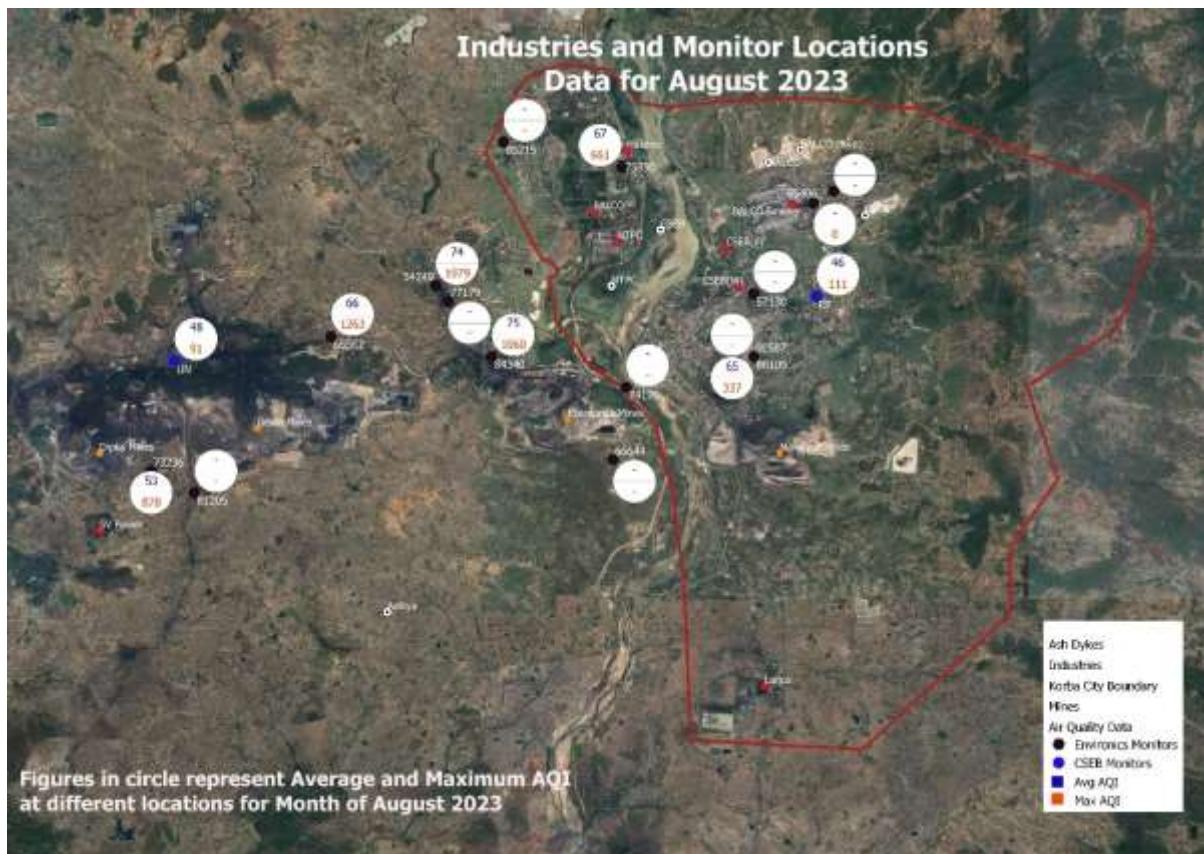

| | Aug-22 | | | Aug-23 | | |
|-------|--------|-------|-----|--------|-------|-----|
| | PM 2.5 | PM 10 | AQI | PM 2.5 | PM 10 | AQI |
| Korba | 48 | 56 | 80 | 40 | 45 | 67 |
| Delhi | 40 | 43 | 67 | 37 | 42 | 62 |

Data for individual devices placed at Korba can be seen in below table. Out of 7 devices which worked in Korba in this period 4 devices recorded maximum AQI greater than 1000. Average Monthly AQI is above 100 in only 1 location. Device placed at Sirki recorded the highest Average AQI at 106. Device placed at Hardi Bazar measured the best AQI at 53

| Location Wise Average and Maximum AQI for Devices at Korba | | | |
|--|--------------------------------------|-------------|-------------|
| Device Number | Location | Average AQI | Maximum AQI |

The map image below shows the locations of the devices installed in Korba along with the locations of major coal mines, Thermal power plants and ash dykes. The Korba municipal boundary is marked in Red colour. The numbers in the map show the Average and Maximum AQI for each location along with the device number. Two monitors have been installed by CSEB at Ram Pur and Urja Nagar. Average Monthly AQI for August 2023 recorded by these devices is as below. Devices placed by Environics have been consistently recording higher AQI values. It may be because of placement of devices around Pollution sources which show such stark differences

| | | | |
|--|---------|------------|------------|
